

**American Honda Motor Co., Inc.
2013 Honda Fit EV
Important Information for Customers**

The selection of a car has always been an exhilarating process for the customer. From the days of going down to the showroom to "kick the tires" of the new models until today, when customers have an incredible amount of information available to them on the internet, customers have always searched for the "perfect vehicle" to match their transportation needs.

Honda is excited that you have expressed interest in our new electric vehicle, the Fit EV. If you are receiving this information, you have completed the readiness assessment on Honda's Fit EV site: <http://automobiles.honda.com/fit-ev/>, and viewed detail information on the car. The information presented here will not repeat the information presented on the website.

Also, as you proceed through the process of qualifying to lease a Fit EV and ultimately take delivery of the vehicle, you will receive several documents on the transaction, such as the lease you are entering into and the owner's manual for the vehicle. The information below is not intended to take the place of these documents which you should read and understand as you complete the lease transaction and take delivery of the vehicle.

The Fit EV will not be available for purchase. It may only be leased for 36 months. There are some important differences between the lease of the Fit EV, and the other vehicle leases you may be familiar with. Also, it is important to note that the vehicle will automatically communicate with Honda concerning its location and performance.

Honda is delivering this document to you, early in the selection process, to assist you in understanding the characteristics of an electric vehicle and many important terms of the lease, the communication between the car and Honda, and other important features. Having reviewed all of this information, you can confirm your decision that the Fit EV is right for you.

At the time of delivery, you will be asked to sign this document, acknowledging that it was previously provided to you during your research leading up to the lease of the Fit EV.

INFORMATION TRANSMITTED FROM THE VEHICLE TO HONDA

The Fit EV is equipped with monitoring systems that record information about each vehicle, including its location at all times, battery performance and condition, battery charging time and intervals, and other information. This data will be continuously and automatically transmitted to, and recorded by, Honda. This data will be used by Honda to aid further development of Battery Electric Vehicles, to diagnose potential vehicle problems, and for other legally permissible purposes. Honda will not share information concerning an individual vehicle (for example, the location of that vehicle) unless required to do so by a court or other legal authority.

TERMS OF THE LEASE

You will not have an option to purchase the vehicle, either during the term of the lease or at the end of the lease term. Upon the termination of the lease, the car must be returned to Honda. You cannot purchase the vehicle. The lease includes scheduled maintenance, collision insurance, and annual navigation system updates.

FEDERAL TAX CREDIT

Lessees of the Fit EV are not eligible for federal, state or local electric vehicle tax credits that are accorded to vehicle owners. Honda, as the owner of the vehicle, may qualify and has considered the availability of those credits in establishing lease pricing for the consumer.

LIMITS ON WHERE YOU CAN LIVE

By the time you receive this information, you should have been pre-qualified as a candidate for the lease of the Fit EV based on where you now reside and your driving habits. Selected Honda dealers, in a limited number of markets, have the equipment and trained personnel that are necessary to maintain the Fit EV. As such, moving to a location, other than your current residence, that does not have Fit EV dealer support may result in the termination of your lease and the requirement that you return the car to Honda. You will be required to notify Honda if you plan to move.

If your lease is terminated because you relocate, you will not be required to make any additional payments after the lease is terminated. You will be responsible for any past due payments, outstanding taxes, fines such as traffic or parking tickets, fees such as all license, title and registration costs, any Excessive Wear and Use amounts, and Excess Mileage incurred during your lease of the car.

INSURANCE ON THE VEHICLE

You will be required to maintain liability insurance on the vehicle, in accordance with coverage limits specified by Honda. Liability insurance covers damages which you may cause to others during the operation of the vehicle. Collision insurance, which covers loss or damage to the vehicle, is not required, as it is included with the Fit EV lease.

TOTAL LOSS OF THE VEHICLE

If the vehicle is damaged, Honda may, at its option, declare the vehicle a total loss. If this occurs, your lease will terminate. You will not be provided with a replacement vehicle. You may, of course, apply for another lease, subject to availability and consumer demand for the Fit EV.

MAINTENANCE AND REPAIRS

All repairs and scheduled maintenance of your Fit EV must be completed at an authorized Honda Fit EV dealer or in a manner specified by the manufacturer.

MILEAGE AND RANGE RATING ESTIMATES

The United States Environmental Protection Agency (EPA) has rated the 2013 Fit EV with an MPG equivalent (MPGe) of 132 city; 105 highway; and 118 combined, and an 82 mile combined (city/highway) driving range rating (adjusted). Your MPGe and range will vary depending on driving conditions, how you drive and maintain your vehicle, the age and condition of the battery, and other factors. For additional information about EPA ratings, visit:
<http://www.fueleconomy.gov/feg/label/learn-more-electric-label.shtml>.

A NOTE FOR OPERATING FIT EVS IN HOT OR COLD CONDITIONS

The High Voltage battery life can also be affected by ambient temperature. In particular, when it is cold outside, the vehicle's driving range can be reduced, and a longer battery charging time is required. In addition, parking in extremely hot or cold environments can accelerate battery drain. Honda strongly recommends that the Fit EV be stored overnight or for extended periods in a garage or temperature controlled environment in order to reduce the effect that cold temperatures may have on the battery performance.

CHARGING THE BATTERY

Prior to delivery of the vehicle, you are required to have your home inspected and if necessary, installed with the necessary equipment for charging your Fit EV. The cost for the inspection process is a non-refundable, one-time fee of \$100. Should installation be necessary, the \$100 fee will be applied toward installation and equipment costs.

The equipment needed for charging the battery is referred to as the Electric Vehicle Supply Equipment or EVSE. Level 2 charging equipment uses 240 volt/32 amp current. If the battery has been completely exhausted and the vehicle has stopped, it will require approximately 3.6 hours to recharge using this equipment; 3.3 hours if the indicator in the car shows "E"; and 2.9 hours if the low battery indicator is displayed. The battery may also be charged using the Level 1, 120 volt charging cord provided with the vehicle by connecting to a dedicated 120 volt/15 amp circuit, if appropriately equipped and inspected. However, charging using this method will require 19 hours if the car has stopped; 17 hours if the indicator in the car shows "E" and 15 hours if the low battery indicator is displayed.

QUESTIONS

If you have questions about this information, or any other aspect of the Fit EV or the lease, please contact your authorized Honda Fit EV dealer.
